About Us

Ari Water is a Kenyan water packaging and refilling company operated under Aritwin Limited, registered in July 2025. The name carries a personal story — “Ari” is the shared prefix of the founders' twin daughters, and it now carries the brand as it grows.

Our focus today is straightforward: clean, reliably available water — packaged and delivered, or refilled on demand — for the households, offices, and events that depend on it. As the business grows, we're building the operational foundation to expand thoughtfully into new products and services.

Pure Water. Pure Living.

What We Do

- Packaged drinking water — for households, offices, retailers, and distributors.
- Water refilling services — for repeat customers and businesses looking for a reliable, ongoing supply.
- Bulk and event supply — water packaging and refilling for gatherings, functions, and events.

As our product catalogue is formalized, this section will expand to list specific pack sizes and any additional product lines.

Who We Serve

Segment	How We Serve Them
Households	Everyday packaged water for home consumption and refill top-ups.
Offices	Reliable, ongoing water supply for workplaces.
Retailers	Packaged stock for resale.
Distributors	Bulk supply for wider distribution.
Events	On-demand packaging and refilling for gatherings and functions.

Leadership

Ari Water is led by its founding team under Aritwin Limited, with leadership and governance held at the company level.

Looking Ahead

Ari Water is investing in the systems behind the brand — a digital platform to manage products, orders, and payments — so the business runs professionally as it scales. The goal is straightforward: make the business easier to manage, present it professionally to the market, and grow our share of it, while staying committed to delivering a consistently safe, healthy product our customers can rely on.
